

# VULCAN

A simple semi-scale  
catapult glider  
by D. S. George

Easily made from  $\frac{1}{16}$  in.  
and  $\frac{1}{8}$  in. sheet balsa this  
glider will give loads  
of fun and with sur-  
prising performance.  
Balance at the join  
line, i.e., 3 in.  
back from the  
leading edge.

Launch in a  
near vertical  
attitude. A strong  
elastic band attach-  
ed to a short length  
of  $\frac{1}{16}$  in. or larger  
dowel is used as  
a catapult.
